

Grant Agreement Number: 723833		
Project Title: ENgineering COMPASS		
Project Acronym: ENCOMPASS	Duration: 1 st October 2016 – 30 September 2019	
Date: 31/12/2016	Project Website Address: www.encompass-am.eu	
EC Project Officer: Christoph HELMRATH	Email: Christoph.HELLMRATH@ec.europa.eu	
Work Package Number:	Deliverable Number: 7.3	
Deliverable Name: Creation of ENCOMPASS project website internal and external use, periodically updated at least every 3 months		
Date of Delivery: 31 st December 2016	Actual	
Status	Draft <input type="checkbox"/>	Final <input type="checkbox"/>
Nature	Prototype <input type="checkbox"/> Report <input type="checkbox"/> Specification <input type="checkbox"/> Tool <input type="checkbox"/> Other <input type="checkbox"/>	
Distribution Type	Public <input checked="" type="checkbox"/> Restricted <input type="checkbox"/> Consortium <input checked="" type="checkbox"/>	
Authoring Partner: EWF		
Contact Person: Eurico Assunção and Rita Bola		
Email: EGAssuncao@ewf.be rgbola@ewf.be	Phone	Fax
Abstract (for dissemination)	n/a	
Keywords	n/a	
Name of the Scientific Representative of the Project's Co-ordinator, Title and Organisation:	Name: Dr David Brackett Tel: +44 (0)2476 647331 E-mail: David.Brickett@the-mtc.org	

This project has received funding from the European Union's Horizon 2020 research programme under grant agreement No. H2020-FOF-2016-723833-ENCOMPASS

1 Introduction

The ENCOMPASS project will create a fully digital integrated design decision support (IDDS) system to cover the whole manufacturing chain for a laser powder bed fusion (L-PBF) process encompassing all individual processes within in. The ENCOMPASS concept takes a comprehensive view of the L-PBF process chain through synergising and optimising the key stages. The integration at digital level enables numerous synergies between the steps in the process chain and in addition, the steps themselves are being optimised to improve the capability and efficiency of the overall manufacturing chain. ENCOMPASS addresses the three key steps in the process chain: component design, build process, and post-build process steps (post-processing and inspection).

By considering the entire AM process chain, rather than the AM machine in isolation, ENCOMPASS will integrate process decision making tools and produce substantial increases in AM productivity, with clear reductions in change over times and re-design, along with increased ‘right-first time’, leading to overall reductions in production costs, materials wastage, and over-processing. This will lead to higher economic and environmental sustainability of manufacturing, and re-inforce the EU’s position in industrial leadership in laser based AM.

The project started on the 1st of October 2016 and will have a duration of 36 months. The project website was planned to be delivered at month 3 to help sharing the information between the consortium and the public.

2 Deliverable 7.3

This deliverable results from an activity in Task 7.5: Marketing, where the main objective is to market the ENCOMPASS project and its results to as wide an audience as possible. The website will facilitate the dissemination of the project to third parties and the general public and it will be updated every three months

3 Logo

The logo of the project is presented in **Erro! A origem da referência não foi encontrada..**

4 Website

The project website is available for the following URL: www.encompass-am.eu. The website is structured in five main tabs including: Home, About, Documents, Partners and Contact. The aim is to have a continuous update the information on the website with the progress and public results, meetings, events and useful links. The disclaimer is always presented in the bottom of the page in every tab available. The website was developed by EWF.

4.1 Home Tab

The Home tab is the one presented when entering the website page. There, it is possible to be linked to the other tabs available, to the ENCOMPASS news and have a brief idea of the consortium.

4.2 About Tab

When clicking the About tab, it is possible to choose between four sub tabs as the following image demonstrates.

The sub-tabs are:

- Objectives;
- Impact;
- Implementation;
- Project Background.

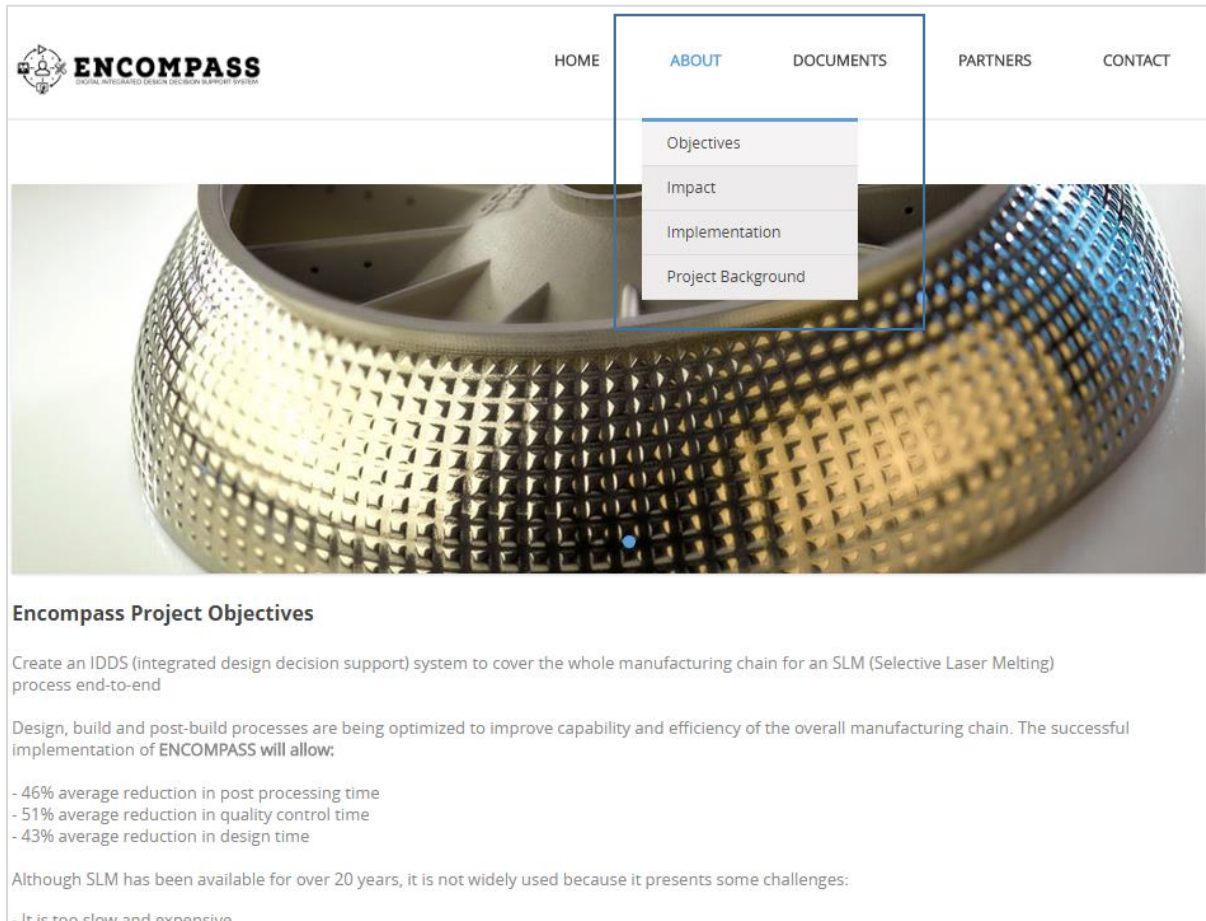

Figure 4-1: Objectives sub-tab

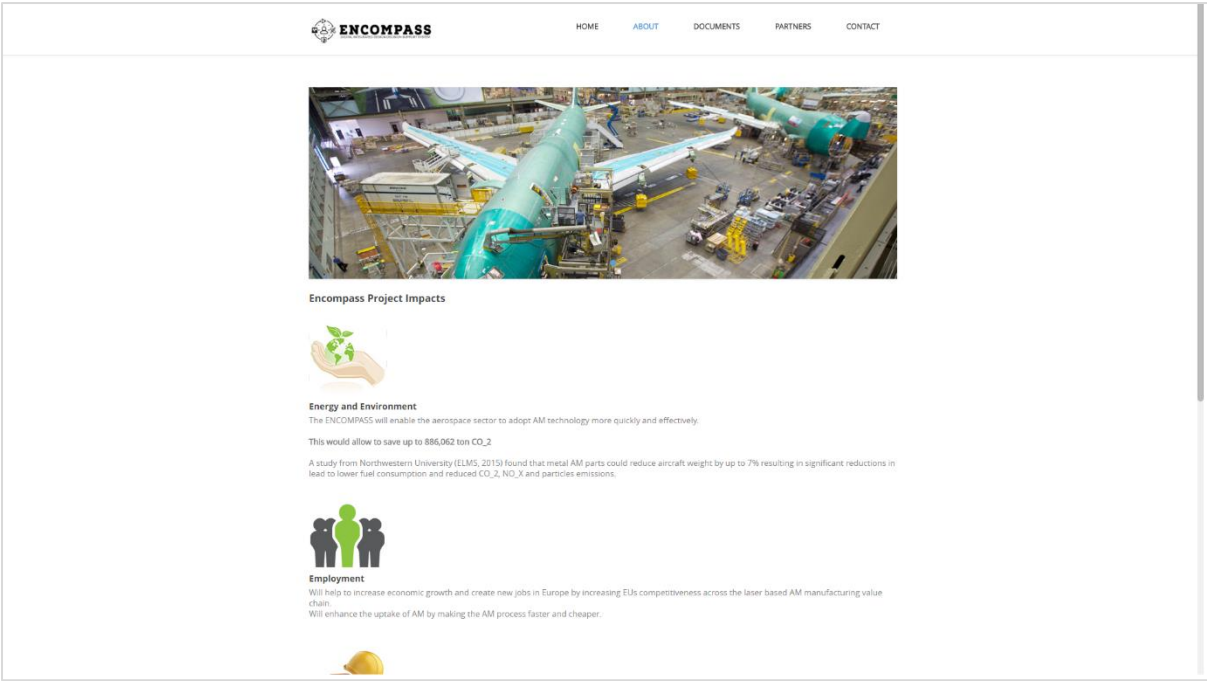

Figure 4-2: Impact sub-tab

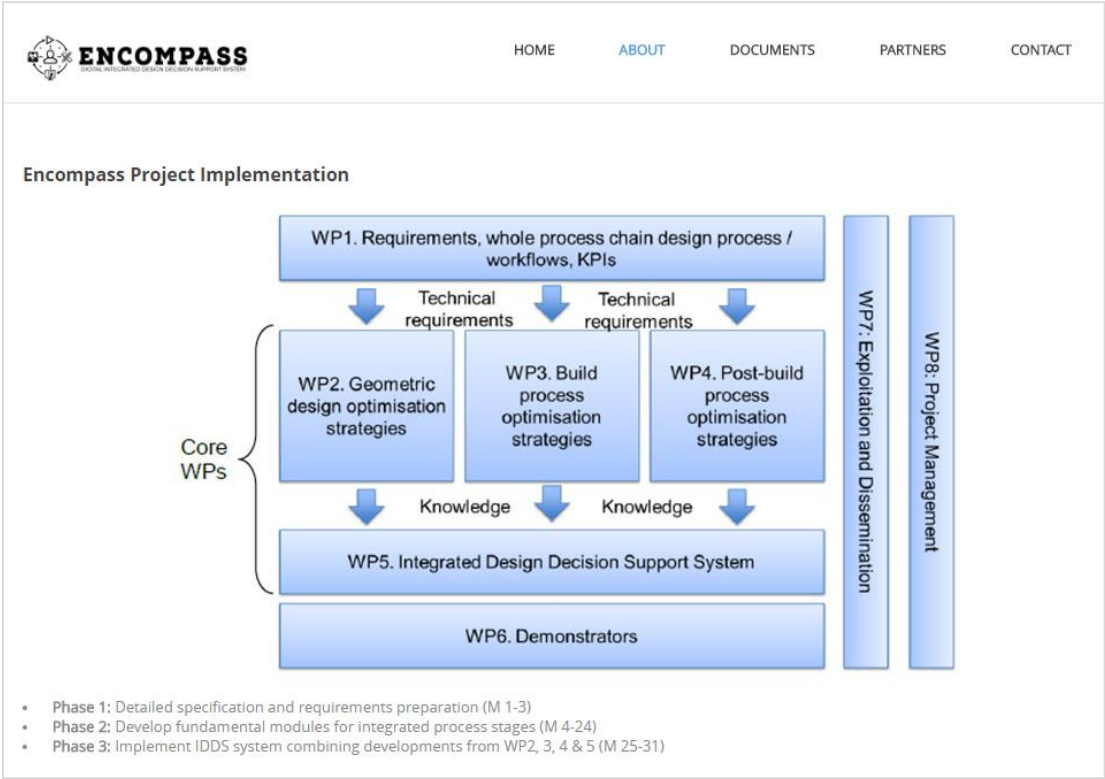

Figure 4-3: Implementation sub-tab

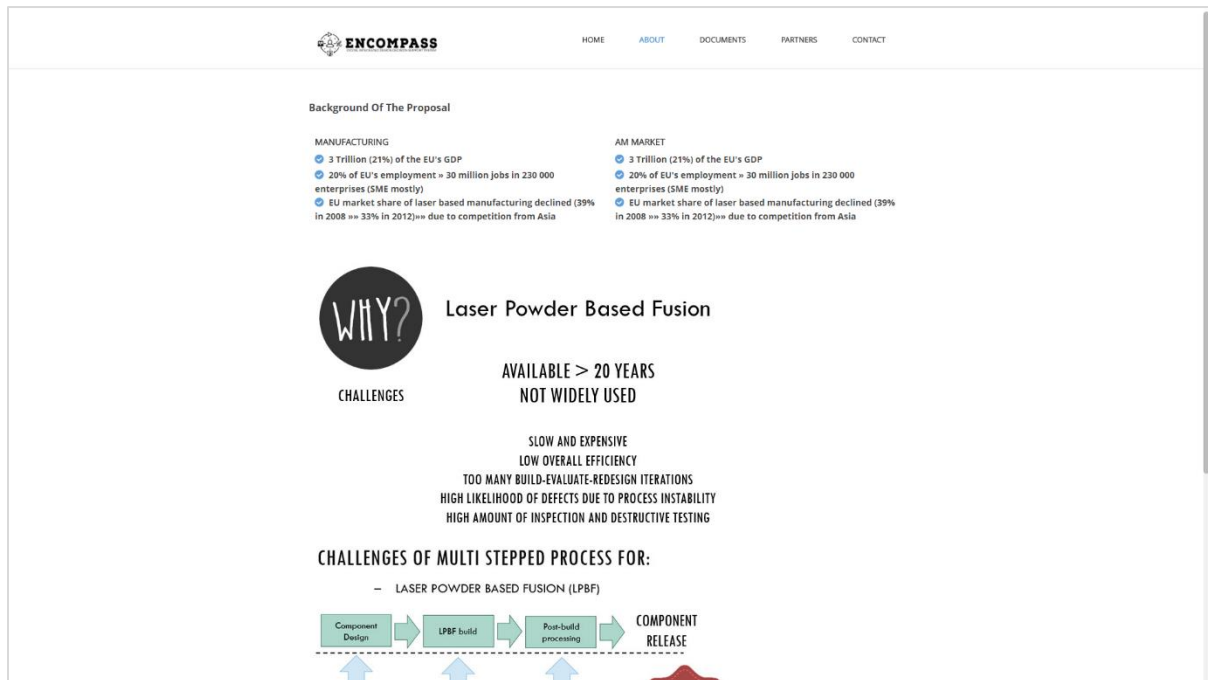

Figure 4-4: Background sub-tab

4.3 Documents Tab

The Documents tab is still in development at the moment. Its main point is to share documents with the public, being possible their downloads. Examples of public documents are the project press release, the project kick-off presentation, photos from events that the project consortium attends, among others.

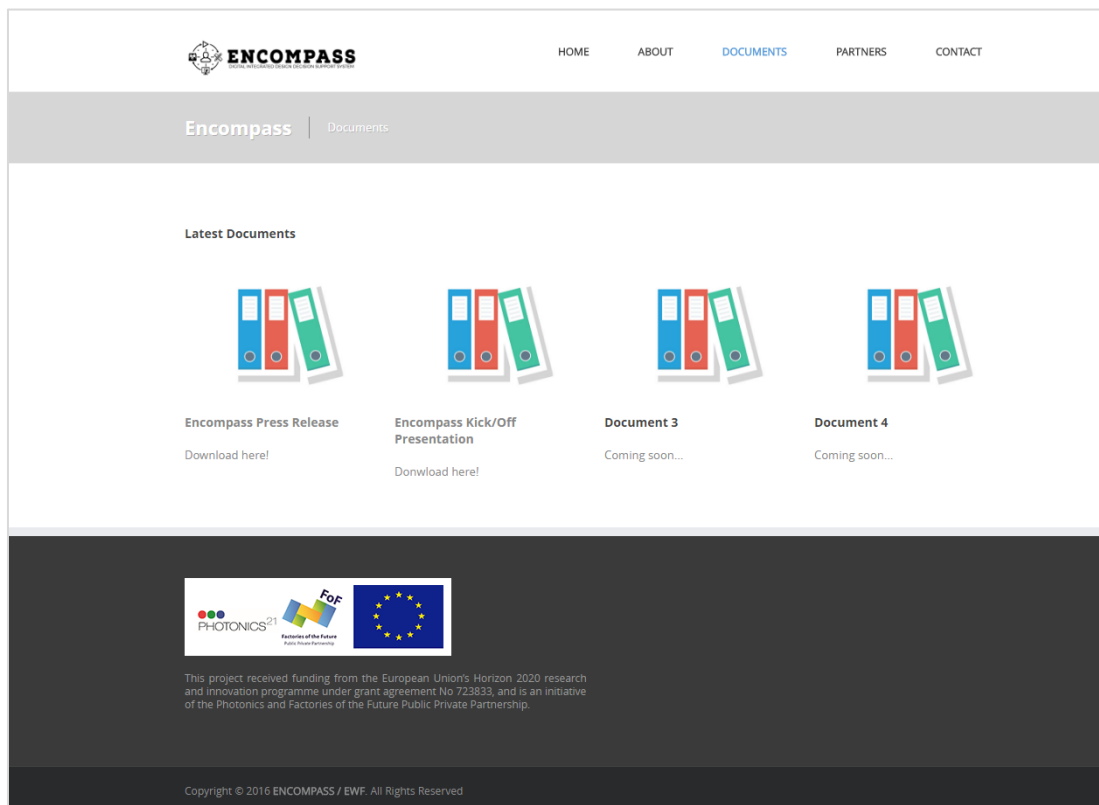

Figure 4-5: Documents Tab

4.4 Partners Tab

In the Partners Tab it is possible to see all the partners involved in the project along with a brief description on their own companies.

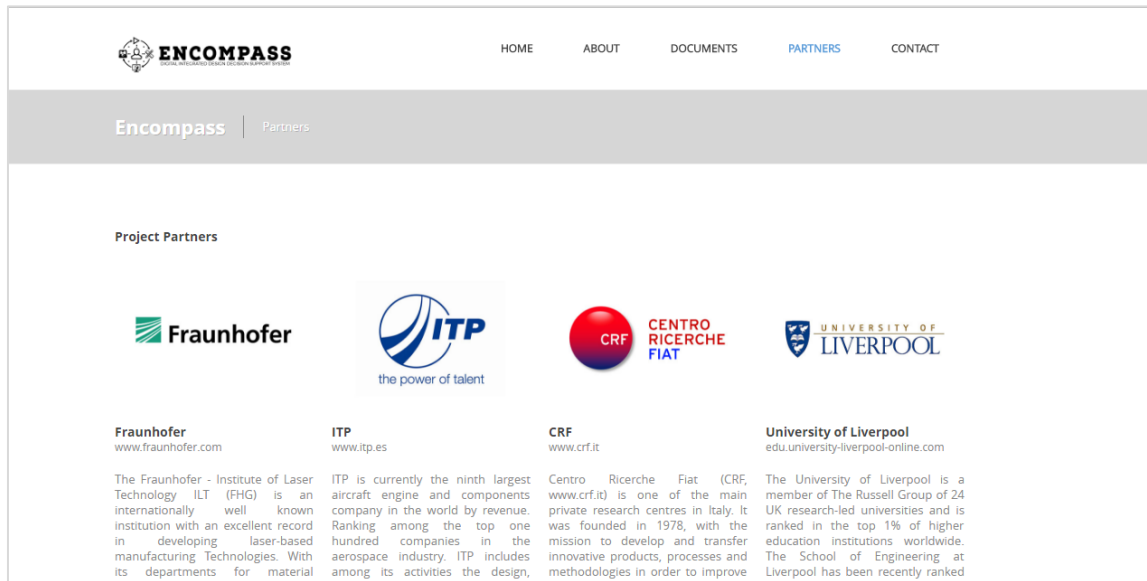

Figure 4-6: Partners Tab – Pt. I

Figure 4-7: Partners Tab – Pt. II

4.5 Contacts Tab

The contacts tab main objective is to allow the public in general that can be interested in the project results to know, or to have a direct contact with the consortium.

This communication will be performed by the project coordinator, MTC.
